

FORGING (EUROPE OPERATIONS)

Mahindra Forgings Europe AG represents Mahindra Forgings Ltd's Europe presence through 10 plants spread across Germany and UK. Over 180 years of European experience helps Mahindra Systech group companies synergise Engineering, Sourcing and Customer expectation management.

Global multi-locational forging capacities make MFL one amongst top 5 forging companies in the world. The company has a combined European capacity of 185000 MT. The forging capacity includes range of Presses, Hammer lines, Hot Extrusion presses, Upsetters, Rotary Swaging and Friction Welding machines. The machine shop set up supports customer specific requirements. More than 37% of the forged parts are finished machined or even supplied as assembled components.

The company enjoys strategic relationship with all major European Truck OEM's by having early engagement in product development. The company has a well balanced portfolio of Non-Automotive customers.

Mahindra Forgings Europe AG

MFE AG is one of the top five Forging companies in Germany. GSA at Aalen (70000MT), Jeco at Gevelsberg (15000MT) and Falkenroth at Schalksmuehle (18000MT) operates mainly in the Automotive (commercial vehicle) and Non-Automotive (construction, earth-moving) segments. The company's outstanding product development capabilities have led to many joint IPR patents with the customers.

Schöneweiss Group

With plant at Hagen and Gevelsberg, Schöneweiss (50000 MT) is one of top five Axle Beam manufacturers in the world and specializes in suspension, powertrain and engine parts. Extensive use of Schöneweiss innovation process (SIP)/Simultaneous Engineering has earned us the reputation of a Successful Development Partner of German OEMs.

Stokes Forging Group

Stokes (32000MT) is the largest automotive forging company in the UK with three plants located in West Midlands. The company is a key supplier to numerous Automotive and Non-Automotive OEMs and Tier 1 manufacturers.

Manufacturing Capabilities

- Forging Presses - 630MT to 12800MT
- Forging Hammers - 31.5 to 250 KJ
- Hot Extrusion - 630 to 1000MT
- Horizontal Upsetters - 900 to 1600MT
- Rotary Swaging (2000kN) & Friction Welding
- Machining / Assembly - Engine / Axle / Chassis Components
- ISO/TS 16949, ISO 14001, OHSAS 18001 certified

Product Profile

MAHINDRA FORGING EUROPE AG	SCHÖNEWEISS GROUP	STOKES FORGING GROUP
Pitman Arms, Steering Knuckles, Draw Bar Eyes, Sector Shafts, Pistons	Front Axle Beams, Steering Knuckles, Camshafts, Cabin Stabilisator Bar	Shafts, Bearing Hubs, Rear Control Arms, Steering Knuckles
