

## FORGING (INDIA OPERATIONS)

Mahindra Forgings' India unit (MFL) is one of India's top 3 Forging companies with an installed capacity of 90000 MT and holds a leadership position in Crankshafts and Stub Axles manufacturing in India.

In the past few years, MFL has undergone an expansion project to augment capacity and broaden its portfolio of services. One major highlight has been the commissioning of machining lines for Crankshafts and Stub Axles in addition to new Forging presses.

Complementary backup with wide range of Forging presses help satisfy customers who depend on us as a single source supplier.

### Manufacturing Facilities

- Presses - 1000MT to 6300MT with a weight range of 0.50 to 50Kg
- Machining - Crankshaft (130000 p.a.) and Stub Axle (100000 p.a.)

### Quality Enablers

- ISO / TS 16949 certified
- In-house power back up for uninterrupted production
- In-house Tool & Die Development
- Design Center - FEA, Delcam, Deform, UG, Auto CAD and CATIA
- Metallurgy Lab - Image Analyzer, Spectrometer and Optical Microscope
- State-of-the-art Inspection and Testing (Tensile strength) facilities

### Product Profile

- Crankshafts
- Steering Knuckles
- Connecting Rods
- Stub Axles
- Control Arms
- Links
- Crankshafts and Stub Axles machining
