

ENGINEERING SERVICES

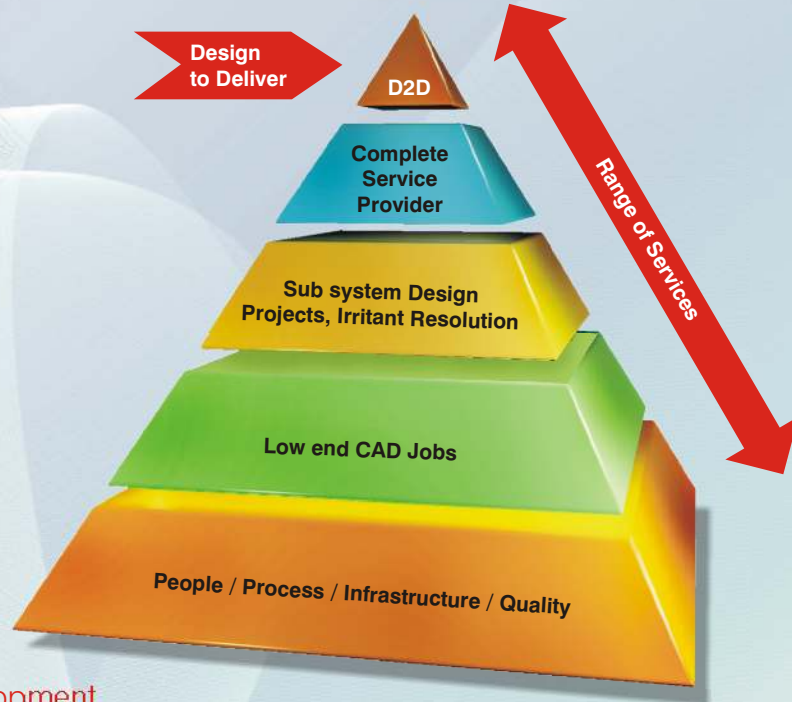

Mahindra Engineering Services is a leading engineering services provider with headquarter in Mumbai and development centres in Pune, Bangalore and Chennai in India and internationally in UK, USA, Italy & Germany.

Started in 2003, MES has a highly experienced engineering and product development resource pool. Today at MES, over 1350 engineers are working on projects in the automotive domain, ranging from conceptualization to development phase. To support the team of engineers, MES is backed by a manufacturing set-up to provide assistance in prototyping, rapid prototyping, design and model studio, die and tool manufacturing, parts supply and testing setup.

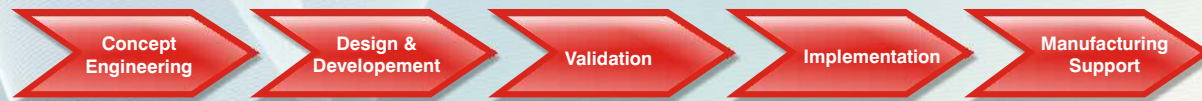

MES's strategic geographical locations and various delivery models (on-site, offshore and dual-shore), offer the advantage of 24X7 operations, leveraging time zone differentials, and moving from concept to product in the shortest time possible.

MES caters to Automotive, Aerospace and Defense domains. It also offers services to General Engineering Industry.

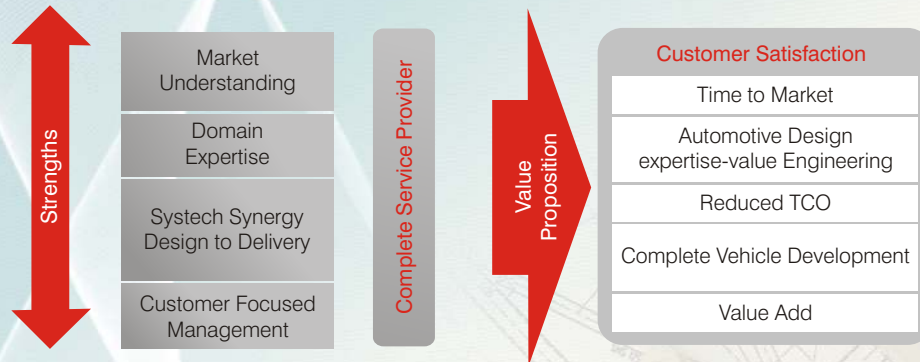

Description of Business

Service Development

Value Proposition

A unique combination of core domain expertise added with service industry delivery standards.
