

Mahindra 'Systech Day' at DAF Trucks in Eindhoven, the Netherlands, by Mahindra Forgings Europe AG

Mahindra Systech Sector's European forging group recently organized a successful Tech Day by invitation of the Dutch truck manufacturer, DAF.

A broad range of products and services exhibiting the entire Systech Sector were presented along with interactive seminars on state-of-the-art production processes and current developmental projects.

Mahindra Systech, the component & engineering sector of Mahindra & Mahindra, had the opportunity to present a successful 'Systech Day' at DAF Trucks N.V. in Eindhoven by invitation of the Dutch truck

manufacturer. The event was lead by the European forging group of Systech, Mahindra Forgings Europe AG. It was an important occasion for Systech to present its broad range of products and services as well as to explore possible synergies for its group companies and leverage its current business relationship with DAF.

Dr. Ronald Rittmann, Sales Director of MFE AG, introduced the event with a leadership talk about the Mahindra Group and its global footprints. Visitors were given a complete overview on Systech with emphasis on the broad variety of production possibilities and possible synergies within the sector. The Tech Day also included an exhibition of key component parts for commercial vehicles from various leading Systech sector companies such as Mahindra forgings India, castings, gears and composites.

The event witnessed participation from important decision making officials in Purchasing, Design & Development and Quality Department departments at DAF trucks. Interactive discussions

were held during seminars on the latest production processes and current developmental projects at MFE AG. The forging group focussed on the area of Research & Development as well as pre-assembly of parts in order to use synergies and exchange know-how. The specialist team of referees from MFE AG also involved Sales Manager Frank Krüger as well as the Managers of Design & Development, Dr. Jens Kuche and Dirk Bauer.

The event was successful in diversifying DAF's interest in other Systech companies apart from Schöneweiss, a member of MFE AG and supplier of connecting levers, rear stub axles and break supports to DAF. While Schoneweiss was instrumental in organising the Tech Day, MFE companies such as GSA and Jeco Jellinghaus and Mahindra Composites from the Systech Sector received serious business considerations from top DAF officials.

Overall, all the visitors showed high interest and were pleased with the broad range of products and services that were presented on behalf of Systech sector.
